

THE
**CYBERRISK
RATING**

by KSV1870

Making digital risks visible
in global supply chains.

Based on the Cyber
Risk scheme of the

KSV1870

The overall solution for third party cyber risk management according to NIS & GDPR – from Austria, applicable worldwide.

The EU-GDPR and the EU-NIS Directive require all organisations, especially operators of essential services, to have professional cyber risk management for service providers, suppliers and third parties.

The Austrian CyberRisk Rating creates a new cyber security standard for this purpose. Cyber risks in global supply chains become transparent and can thus be reduced in a targeted manner.

- Easily understandable rating, based on the established system of KSV1870
- Assessing IT security, business continuity management and GDPR compliance
- Developed by Austrian specialists
- Compatible with the EU-NIS directive and the GDPR
- Rating process in German and English for global suppliers

The Austrian CyberRisk Ratings by KSV1870

Amount of damage x probability of occurrence

FOR YOUR TOTAL SUPPLIER BASE:

WebRisk Indicator (C-Score)

- Basic information for **all your suppliers**
- Evaluates information **accessible from the outside**
- **Available at short notice**

FOR SENSITIVE SUPPLIERS

CyberRisk Rating with assessment

- Professionally validated
- based on **KSÖ's Cyber risk scheme**
- **A+ rating** through additional **audit**

* The CyberRisk Rating supports more advanced measures such as technical audits through baseline data collection & audit approval of the supplier.

Process of the CyberRisk Ratings

WebRisk Indicator

The WebRisk indicator (C-Score) is available for all your suppliers in the short term and serves as an initial assessment of cyber risks.

Select suppliers

You now choose for which of your suppliers you want to order a CyberRisk Rating.

Assessment process

The suppliers you have selected will be notified and invited to participate in the assessment.

Validation

The answers given in the assessment by the rated company are validated by qualified examiners. Problems are clarified and the supplier then has the opportunity to correct his statements once before the CyberRisk Rating is calculated on their basis.

CyberRisk Rating available

You will receive a notification as soon as the rating process is completed.

Control: The Cyber Risk Advisory Board

Energy, transport, banking, financial market infrastructure, healthcare, drinking water supply, digital infrastructure & digital service providers, public administration and scheme team

The requirements of the Cyber Risk scheme were defined by leading cyber risk managers from all sectors of critical infrastructure, as well as representatives of well-known Austrian companies - the rating is therefore suitable for any industry and any economic sector. The publicly and freely accessible scheme is continuously maintained by the Cyber Risk Advisory Board in order to be able to react quickly to new requirements from practice or the NIS authority (BMI-BVT).

→ More about the requirements defined in KSÖ's Cyber Risk scheme can be found as a PDF at www.nimbusec.com/cyberrisk

Assessment of IT security, business continuity management & DSGVO compliance made easy – with the CyberRisk Rating by KSV1870

→ One process for all suppliers

Third party risk management according to the NIS directive and GDPR
